

<b>Fakultas Teknik UNP Padang</b>	<b>Waktu : 3 x 50"</b>
<b>Departemen : Teknik Elektronika</b>	<b>Mata Kuliah : Pemograman Sistem Bergerak</b>
<b>Prodi : Pend.Teknik Informatika</b>	<b>Topik : React Native</b>
<b>Kode : TIK1.61.5308</b>	<b>Judul : Navigation 2</b>

## **A.LEARNING OUTCOMES PRAKTIKUM**

- Mampu menggunakan aplikasi Visual Studio Code untuk membuat project React Native APP
- Memahami cara menggunakan Navigation pada React Native

## **B.ALAT dan BAHAN**

1. Personal Computer dengan tersedianya aplikasi Visual Studio Code
2. Android Studio
3. Node.JS
4. Yarn
5. ES-7 Snippets plugin for VScode
6. Koneksi Internet

## **C.TEORI SINGKAT**

### **React Navigation**

Navigasi dalam React Native (React Navigation) merupakan hasil kerja keras komunitas Facebook dan Expo untuk menciptakan sistem navigasi yang mudah digunakan didalam React Native. Ia merupakan implementasi dari Javascript yang mengartikan bahwa aplikasinya nanti bisa berjalan pada platform android maupun IOS.

React Navigation adalah salah satu solusi kita untuk menavigasi tampilan di React Native. React Navigation memberikan kemudahan dalam menavigasi tampilan dengan menyediakan kemampuan stack dan tabbed navigation pattern yang dapat berjalan baik di OS Android maupun IOS. Terdapat tiga hal mendasar yang akan kita pelajari pada artikel ini, yaitu bagaimana membuat tab, stack dan modal menggunakan React Navigation.

Fakultas Teknik UNP Padang	Waktu : 3 x 50"
Departemen : Teknik Elektronika	Mata Kuliah : Pemograman Sistem Bergerak
Prodi : Pend.Teknik Informatika	Topik : React Native
Kode : TIK1.61.5308	Judul : Navigation 2

#### D. LANGKAH KERJA

1. Buka CMD – Lalu akses file project yang telah dibuat sebelumnya,
2. Tambahkan **yarn add react-navigation react-navigation-tabs**

```

C:\WINDOWS\system32\cmd.exe
C:\Users\acer\Project-PSB>yarn add react-navigation react-navigation-tabs
yarn add v1.22.19
warning package-lock.json found. Your project contains lock files generated by tools other than Yarn. It is advised not to mix package managers in order to avoid resolution inconsistencies caused by unsynchronized lock files. To clear this warning, remove package-lock.json.
[1/4] Resolving packages...
warning @expo/webpack-config > webpack-dev-server > chokidar > fsevents@1.2.13: fsevents 1 will break on node v14+ and could be using insecure binaries. Upgrade to fsevents 2.
[2/4] Fetching packages...
warning mini-css-extract-plugin@0.5.0: Invalid bin field for "mini-css-extract-plugin".
[3/4] Linking dependencies...
warning "react-native > react-native-codegen > jscodeshift@0.13.1" has unmet peer dependency "@babel/preset-env@^7.1.6".
warning "react-navigation-tabs > react-native-tab-view@2.16.0" has unmet peer dependency "react-native-gesture-handler@*".

warning " > react-navigation-tabs@2.11.2" has incorrect peer dependency "react-native-reanimated@^1.0.0-alpha".
[4/4] Building fresh packages...

```

3. Selanjutnya kita akan menggunakan FontAwesome untuk ikonnya. Untuk itu kita perlu menambahkannya pada project:

**yarn add react-native-svg @fortawesome/fontawesome-svg-core @fortawesome/free-solid-svg-icons @fortawesome/react-native-fontawesome**

```

C:\WINDOWS\system32\cmd.exe
C:\Users\acer\Project-PSB>yarn add react-native-svg @fortawesome/fontawesome-svg-core @fortawesome/free-solid-svg-icons @fortawesome/react-native-fontawesome
yarn add v1.22.19
warning package-lock.json found. Your project contains lock files generated by tools other than Yarn. It is advised not to mix package managers in order to avoid resolution inconsistencies caused by unsynchronized lock files. To clear this warning, remove package-lock.json.
[1/4] Resolving packages...
[2/4] Fetching packages...
[3/4] Linking dependencies...
warning "react-native > react-native-codegen > jscodeshift@0.13.1" has unmet peer dependency "@babel/preset-env@^7.1.6".
